

Mathematical Reasoning Trace

S1: Given $x + y = 10$

DEFINITION

S2: Given $2x - y = 5$

DEFINITION

S3: Adding Eq. $3x = 15$

COMPUTATION

S4: Therefore $x = 5$

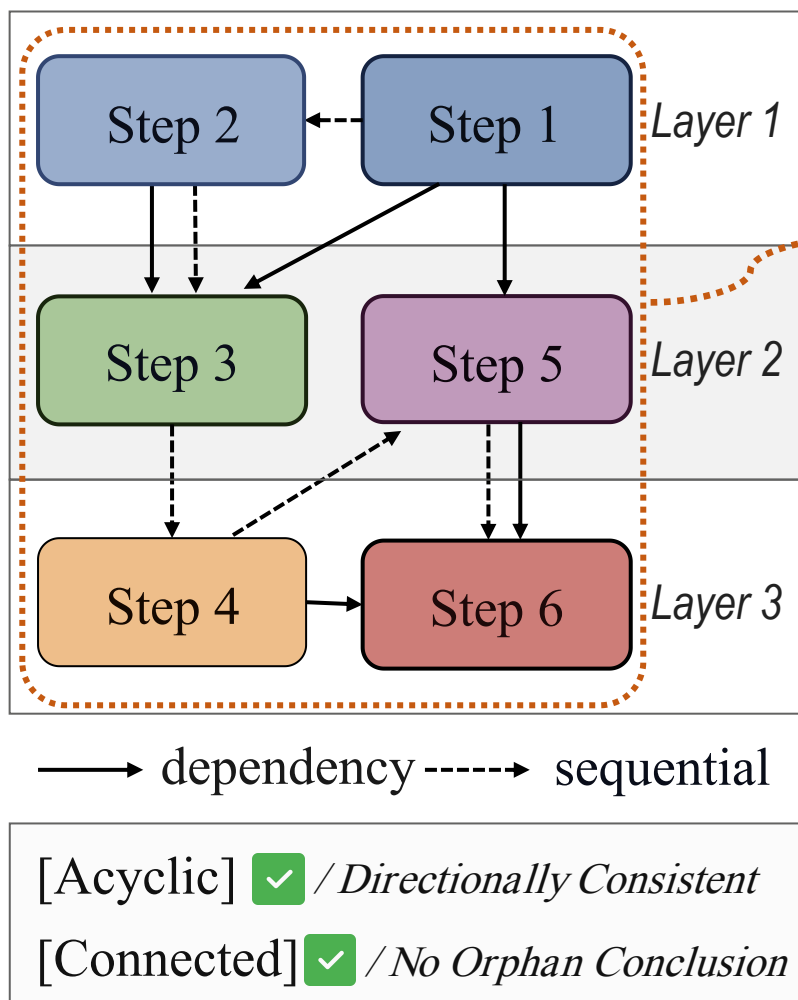

DERIVATION

S5: Substitute $y = 10 - 5 = 5$

SUBSTITUTION

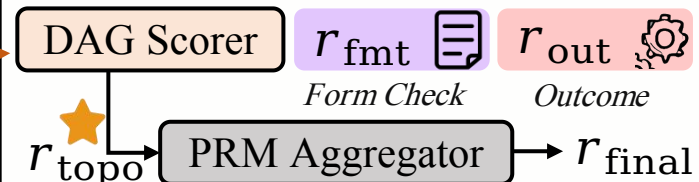

S6: Conclude $x = 5, y = 5$

CONCLUSION

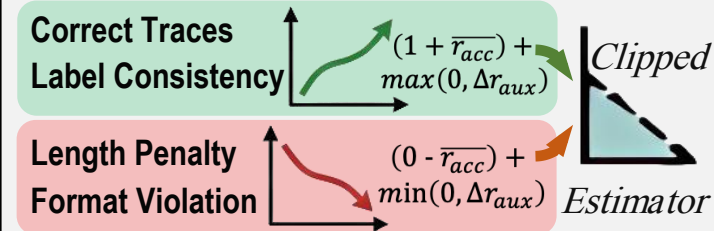

Topology-Guided Self-Distillation

Implicit Process Reward Model

Stratified Clipping Advantage Estimation

Topology-Guided On-Policy Distillation
